Application/Control Number: 10/566,201

Art Unit: 1638

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-14, 20-28, drawn to a polynucleotide comprising SEQ ID NO: 1 or 2 or derivatives thereof inducible by organic compounds, vectors, hosts, and plants transformed therewith, for example.

Group II, claim(s) 15-16, 18-19, 29-33, drawn to a method of using a Bax gene to identify any putative promoters, for example.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The inventions are linked by the technical feature of a chemically regulatable polynucleotides and their use in hosts. However, this technical feature is not special because it does not constitute an advance over the prior art.

Ryals, et al (WO 95 19443 A, 20 July 1995) teaches chemically regulatable nucleic acids inducible by salicylic acid and uses thereof, Claims 1-3, 8 for example.

Lebel et al teaches chemically inducible genes inducible by salicylic acid and uses thereof (Lebel, et al WO 98 03536 A 1/1998, SEQ ID NO: 1, page 5, paragraph 2, lines 2-6).

Art Unit: 1638

Bell, et al, (1991) J. Bacteriology 173:6657-6664) teaches an isolated benzoate inducible promoter (see, e.g., page 6657, Abstract).

Federspiel et al, (Database EMBL, 7 February 2000, Federspiel: Arabidopsis thaliana chromosome I BAG T14P4 genomic sequence, complete sequence. Database accession no. AC022521) teaches SEQ ID NO: 1.

In addition to an election of one of inventions I-II listed above, if Applicant elects

Group I, Applicant is required to elect one and only one of the following inventions to
which the claims must be restricted.

A: SEQ ID NO: 1;

B: SEQ ID NO: 2.

Applicants are reminded that nucleotide sequences encoding different genetic elements are structurally distinct chemical compounds and are unrelated to one another. These sequences are thus deemed to normally constitute independent and distinct inventions within the meaning of 35 U.S.C. 121. Absent evidence to the contrary, each such nucleotide sequence is presumed to represent an independent and distinct invention, subject to a restriction requirement pursuant to 35 U.S.C. 121 and 37 CFR 1.141 et seq.

Furthermore, the invention of Group I, a polynucleotide comprising SEQ ID NO: 1 or 2 or derivatives thereof inducible by organic compounds, vectors, hosts, and plants transformed therewith, requires SEQ ID NO: 1 or SEQ ID NO: 2, each not required by Group II.

The invention of Group II, a method of using a Bax gene to identify any putative promoters, requires the Bax gene, not required by Group I. Also, the method of Group II can be practiced without the sequence of Group I.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brendan O. Baggot whose telephone number is 571/272-5265. The examiner can normally be reached on Monday - Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anne Marie Grunberg can be reached on 571/272-0975. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
